[redacted]

P. 245--The port of Tamatave is resuming bit by bit its normal traffic. It is the outlet of one of the richest regions of the island, but the present equipment of this port doesn't fill its needs any longer. the works which have been carried out since 1939 have consisted of completing the sea-wall and of organizing of railroad beds served by seven kilometers of tracks. Its enlargement and its modernization are foreseen in the equipment plan for overseas territories (1946). Built in deep water, it will be able to receive ships having the greatest draught, like, for example, the liner Ile de France. It will thus become the great commercial outlet that Madagascar needs.

SYRIA HAMA

25X1A [redacted]

p. 184--Khan Cheikhoun, in North Syria. In points of the world far separated from one another, the lack of wood for building purposes has led men to similar styles of construction. These dwellings in Khan Cheikhoun which are shaped like artillery shells, the style of which characterized the most ancient buildings of the Syrian Desert, are also found in Africa among the Massas of the Logone region.

France Outremer.

p. 210.

After the Maréchal-Joffre, this steamer of 17,000 tons is the most important unit in the service of the Compagnie des Messageries Maritimes.

Decorated by General de Gaulle for its fine action at the time of the evacuation of Singapore, it rendered a great service during the hostilities, and in order to calculate the losses of the Messageries Maritimes, it suffices to say that it was not the only ship. These losses came to:

189.000 tons for contractual service; [illegible] tons for commercial services, making a total of 223,028 tons.

The fleet of the Messageries Maritimes, with reconstruction in sight, comes to only 130,000 tons for contractual services (compared with 226,000 before the war) and 41,000 tons for commercial services (compared to 75,000 tons before the war). But the Messageries Maritimes ensures, moreover, the exploitation of a certain number of ships returned by the state and which totaled 93,609 tons. Five units like the Marseillaise will come soon to reinforce this fleet.

But, already, it has been able, on the whole, to restore the postal connections assured before the war, from Marseille:

Indochina-Far East Line; Egypt-Libya-Syria Line; Indian Ocean (Madagascar, Reunion, Isle Maurice); New Caledonia and Papeete Line (with a [illegible] service to the New Hebrides).

Through its commercial services [illegible] other ports of Western Europe: Dunkerque, Anvers, Rotterdam, Amsterdam, London, Le Havre, La Pallice, Bordeaux, the [illegible] Marseille, with the ports of Indochina and the Far East, (Port-Saïd, Djibouti, Colombo, [illegible] Singapore, Hong Kong,
